

SEE HOW COLLABORATION FUELS CREATIVITY.

When teams are focused and productive, there's nothing better. Conversation breeds excitement, one person's idea sparks another's insight, perspectives are changed – and the final results are so much stronger than any individual effort. Yet conference room huddles aren't always a reality, with today's teams often spread across cities, campuses, time zones and oceans.

True collaboration is still possible. NEC's family of software tools and devices that empower teams to connect, share and create together. It's a flexible set of solutions that can be customized to meet your individual needs and environment. Add only the features you need, and collaborate as easily as if you were in the same room – with simple and beautiful tools that transform your ideas into reality.

ENABLING TRUE TEAMWORK TO GET PROJECTS DONE

Choose comprehensive software and displays or select out-of-the-box options with the functionality you need. Users can choose from new displays like large desktops or interactive projectors, or they can work with legacy systems and equipment. These solutions are designed to fit seamlessly with your existing workflow.

Mosaic Software

Mosaic Canvas

Mosaic Canvas is robust interactive whiteboard software that's as valuable for corporate huddle and training rooms as it is for K-12 or college classrooms. Multiple team members can annotate in real time, import images, connect devices and work together in a collaborative space.

Mosaic Connect

Mosaic Connect is easy-to-use, wireless presentation software that's cloud supported so teams from across the world or students in a lecture hall can share the content from their device. All that's required is an internet connection to leverage features like media player, file sharing and annotation. Connect works across Windows, iOS, Android and Chrome.

Collaboration Series Hardware

Collaborative Board (CB Series)

CB Series is an intuitive whiteboard perfect for education settings and corporate spaces. A touchscreen display and included stylus inspire interactivity, including easy on-screen annotation, which allows you to mark up maps and sales charts. Wirelessly share from up to four devices.

InfinityBoard™

InfinityBoard is a modular, all-in-one whiteboard designed for team-focused spaces that enables flexible tools like simultaneous annotation. Additional features include Microsoft documents and other Windows compatible software, media player, wireless sharing, conference speakers, Huddly IQ camera, built-in i7 PC and more.

Mosaic Connectbox

Connectbox is a stand-alone wireless device dedicated to beautiful presentations that enables you to share your work from anywhere in the world – at an excellent value. Connects to any HDMI-compatible display device with a USB touch interface.

Customize

NEC's collaboration solutions are expressly designed to be modular and flexible to fit within your workflow. Choose only the software and hardware that suit your projects, space and budget and skip what you don't need.
