

# Azure Red Hat OpenShift Strategy Workshop

## Lay a solid foundation for successful container-based platform deployment.

### About this workshop

Deploying and managing container-based solutions can be overwhelming, even for the most seasoned IT professionals. In this workshop, Insight's cloud experts will help your team understand the benefits of using Kubernetes and the Azure® Red Hat® OpenShift® platform to host your workloads. Participants will work with Insight to outline business objectives, then collaborate to create a set of actionable goals for optimizing your container strategy. We'll touch on numerous topics including logging, monitoring, automated deployments, governance and security.

### Who should attend

This workshop is designed for business leaders and IT professionals who are committed to enabling your organization's success with container-based platforms.

### Preparing for transformation

To ensure you receive the greatest value from this workshop, you will need:

- A group of 5 to ten leaders
- Participation from business leaders that are looking for change (CEO, CIO, CTO, CMO or other business technology leaders)
- Participation from leaders responsible for designing and architecting your enterprise IT systems and solutions
- Participation from leaders responsible for developing and architecting your company's applications
- A culture of cloud agility

### Workshop topics

Led by Insight Digital Innovation's OpenShift experts and architects, participants will gain a solid understanding of the benefits of using Azure Red Hat OpenShift (ARO) to host container-based workloads. Over the course of this workshop, you'll receive expert guidance defining a clear strategy to leverage the ARO platform. This strategy will be informed by Insight's Kubernetes and OpenShift expertise, industry best practices and your organization's goals and objectives. Topics include:

- Azure Red Hat OpenShift overview
- Assessing your container strategy
